

Let us be Vigilant

Principal: Mlekane MB

The whole world has been invaded by an invisible enemy which attacks in a stealth manner, more especially when we turn a blind eye on the recommended precautionary measures by government. This catastrophic disaster that has befallen us needs us to come together and confront it head-on by stringently applying the highly necessary hygiene practices as explicitly alluded to by the President of the Republic. When he addressed the nation On the 16th March 2020.

Amid the turmoil caused by the infamous COVID-19 let us vigilantly continue to discharge our responsibilities with vigour being reminded that we must drastically limit contact and observe social distance at all times. The college is in the process of procuring hands sanitizers which will be distributed to all places of convenience subsequent to the finalization of the procurement process.

We are doing our bid as the college to minimize the risks of

COVID-19

infiltration by this invisible enemy called COVID-19 virus. The 16th of March 2020 marks the day of reckoning when cabinet ministers converged in one room talking to the nation through media, on plans which are in place in relentless effort to curb this pandemic.

Putting emphasis on what has already been widely said, I urge all of us to unequivocally take the precautionary measures.
